6.4.5 Defect Report

After uncovering a defect (bug), testers generate a formal defect report. The purpose of a defect report is to state the problem as clearly as possible so that developers can replicate the defect and fix it.

ID	1
Project	Student Attendance Management System
Product	
Release Version	
Module	Login
Detected Build Version	
Summary	Login fails to display an error message for an invalid password
Description	The login functionality fails to display an error message "password invalid" when an invalid password is entered and the submit button is clicked
